Sent from my family and i are residents of ballyness all our lives and my family go back generations of been resident here in ballyness.
Ballyness bay is nor place of quiet and lots of visitors and locals alike to find peace of mind with our thoughts from worries stresses and noise of everyday life giving us health of mind and body through walking on the beach sea swimming kayaking or just playing with the grandkids who are also residents here.
No one person or group owns the beach it is there created by a power above any of us for the enjoyment of many past present and future generations to come..we are landowners directly onto the beach and have always done our bit to protect nature and the environment and will continue to do so, in granting licences for shellfish farming it is ignoring and endangering wildlife and beauty created for locals and visitors, while allowing this farming it will add to pollution, litter, noise and disturbance on the bay and roads also the protected species including the corncrake which I have heard there many a time. It is unacceptable visually as well..we will now and always and forever be the voice of ballyness bay and strongly object to licences been granted for aqua farming on our beach..regards cox and mc gee family
