Appeal

Monday: 24/02/20

T12/520 T12/522 T12/523

We are making this appeal in which we think to our knowledge of Erabega bay is not near full (capacity) were of (Crocknagee oysters) States. AS our sites are of only 0.9 Hectre and have no issue with getting these licences. Why should our company suffer these terms and conditions. We aren't against Crocknagee oysters in anyway and I think this issue ~~can~~^{can} only be solved between the department and Crocknagee oysters And let the small licences threw this is going on to long. My father

RECEIVED

Started oyster farming on these areas we have in for licence in the early 1990's ~~and~~ before licence was even in Trabega but we continued his path's until 2014 when we were instructed to move all the (oysters) (frames) (bags) from the sites. which we done all. we cleared everything and were told that once all cleared we would be granted licence. were doing everything we can our yard is about 50 yards from the bay and we cant touch it since 2014/15. we currently employ 5 people and these sites. we would of needed another 4/5 people. working. This issue needs to be dealt with quick as if we dont get our seed in before summer we are at higher risk of mortality
